

Identification and Assessment *Down Town Linden*

To record the approximate numbers of live organisms collected in each taxa found in the stream reach, use letter codes: **R** (rare) for 1 to 10; and **C** (common) for 11 or more. ****Do NOT count empty shells, pupae, or terrestrial macro invertebrates.**

Group 1: Sensitive

- R Caddisfly Larvae (Trichoptera)
Except Net-spinning caddis (listed in Group 2)
- R Hellgrammites (Megaloptera)
- R Mayfly nymphs (Ephemeroptera)
- R Gilled (right-handed) snails (Gastropoda)
- R Stonefly nymphs (Plecoptera)
- Water Penny (Coleoptera)
- Water Snipe fly (Diptera)

STREAM QUALITY SCORE

Group 1:
3 # of R's x 5.0 = 15
 _____ # of C's x 5.3 = _____
Group 1 Total = 15

Group 2: Somewhat Sensitive

- Alderfly larvae (Megaloptera)
- R Beetle adults (Coleoptera)
- Beetle larvae (Coleoptera)
- R Black fly larvae (Diptera)
- C Clams (Pelecypoda)
- Crane Fly larvae (Diptera)
- R Crayfish (from count) (Decapoda)
- R Damselfly nymphs (Odonata)
- Dragonfly nymphs (Odonata)
- Net-spinning caddisfly larvae (Hydropsychidae, and Trichoptera)
- C Scuds (Amphipoda)
- R Sowbugs (Isopoda)

Group 2:
5 # of R's x 3.0 = 15
2 # of C's x 3.2 = 6.4
Group 2 Total = 21.4

Group 3:

3 # of R's x 1.1 = 3.3
 _____ # of C's x 1.0 = _____
Group 3 Total = 3.3

Groups 3: Tolerant

- Aquatic worms (Oligochaeta)
- R Leeches (Hirudinea)
- Midge Larvae (Diptera)
- R Pouch snails (Gastropoda)
- True bugs (Hemiptera)
- R Other true flies (Diptera)

Total Stream Quality Score = 39.7

(Sum of totals for groups 1-3; round to nearest whole number)

Check One:

_____ Excellent (> 48) _____ Fair (19 - 33)
 Good (34-48) _____ Poor (< 19)
